## ABSTRACT

This report describes the GATT Standards Code activities conducted by the Standards Code and Information Program, National Institute of Standards and Technology (NIST), for calendar year 1990. NIST responsibilities include operating the U.S. GATT inquiry point for information on standards and certification activities and the technical office for non-agricultural products; notifying the GATT Secretariat of proposed U.S. Federal Government standards-based rules that might significantly affect trade; assisting U.S. industry with standards-related trade problems; and responding to inquiries about proposed foreign and U.S. regulations.

Key Words: certification information; GATT Standards Code; notifications; proposed foreign regulations; standards information; technical assistance

## INTRODUCTION

The Agreement on Technical Barriers to Trade (popularly known as the Standards Code) was negotiated and accepted during the Tokyo Round of Multilateral Trade Negotiations, which took place between 1975 and 1979 under the auspices of the General Agreement on Tariffs and Trade (GATT). The Standards Code is designed to eliminate the use of standards, technical regulations and conformity assessment procedures as unnecessary barriers to trade.

There are currently 40 signatories to the Standards Code; Israel signed in 1990. Thirty of the signatories have actively implemented the Code in their countries. The other 10 signatories have either not: 1) ratified the Agreement; 2) established an inquiry point for standards information; 3) reported any proposed government mandatory regulations (see "Standards Code Signatories"); or 4) some combination of the foregoing. The Code is administered by the GATT Secretariat in Geneva, Switzerland.

In 1990, the new round of multilateral trade negotiations - known as the Uruguay Round - was officially completed. Due to conflicts in non-standards related areas, the negotiations were not finished and new proposals to the Standards Code were not adopted. As this report goes to press, negotiations have been resumed.

The Trade Agreements Act of 1979 ratified the United States' accession to the GATT Standards Code. Under Title IV of the Act, the NIST Office of Standards Services (OSS) is responsible for several provisions which relate to the establishment of a U.S. inquiry point,<sup>1</sup> a standards information center, and a technical office for non-agricultural products.

This report summarizes Standards Code activities conducted by the Standards Code and Information (SCI) Program for calendar year 1990. These functions are performed within the traditional framework of NIST's standards-related programs.

---

<sup>1</sup> The Standards Code requires that each signatory provide an inquiry point to answer all requests for information about technical regulations, standards, and rules of conformity assessment.

## INQUIRY POINT

### Notifications

Signatories of the Standards Code must notify the GATT Secretariat of all proposed government regulations and certification procedures that might significantly affect international trade. The Secretariat, in turn, disseminates the notifications to all other signatories. As the official U.S. GATT inquiry point for information on standards and certification activities, SCI notifies the Secretariat of proposed U.S. Federal Government rules that might significantly affect trade. SCI also receives foreign notifications through the GATT Secretariat and disseminates them, along with supplementary information, to appropriate U.S. companies and industry groups. SCI responds to inquiries about foreign and U.S. notifications, provides copies of the proposed regulations, and arranges for translations of foreign standards. SCI also assists in developing comments on the impact on U.S. industry of proposed foreign regulations and transmits them to the foreign government concerned.

In 1990 the GATT Secretariat issued 362 notifications. Twenty-five signatories reported at least one proposed regulation. (See Table I.) Czechoslovakia had the most notifications (47). Twelve other signatories - Austria, Belgium, Denmark, EEC, Finland, Japan, Netherlands, New Zealand, Philippines, Sweden, United States, and Yugoslavia - each reported 10 or more proposed regulations.

An official in the Office of the U.S. Trade Representative (USTR), based in Geneva, receives notifications from the GATT Secretariat and cables them to the United States. The notifications, all of which are available in English, include the name of the country proposing the regulation; the assigned TBT/Notification number; a brief description of the regulation; and the final date for comments. In order to provide wide access to this information in the United States, all foreign notifications are published in the Commerce Business Daily and several other U.S. publications. SCI maintains a computerized database on all GATT notifications and a telephone GATT hotline where up-to-date notification information can be obtained. The hotline number is (301) 975-4041 (not toll free).

### Proposed U.S. Regulations

All proposed U.S. Government rules (mandatory standards or conformity assessment systems), including proposed revisions, are published in the Federal Register by the responsible Federal agency. SCI staff regularly review the Register to identify those proposed regulations that should be notified to the GATT

Secretariat and send notices directly to the GATT Secretariat via telefax.

In 1990, 30 proposed U.S. regulations, covering such products as motor vehicles, appliances, and foods, were reported. The originating agencies are shown below. (See table II for listing of specific products by agency.)

<u>Agency</u>	<u>No. of 1990 Notifs.</u>
Agriculture, Dept. of (USDA)	2
Consumer Product Safety Commission (CPSC)	5
Energy, Dept. of (DOE)	1
Environmental Protection Agency (EPA)	1
Federal Communications Commission (FCC)	1
Food and Drug Administration (FDA)	10
Housing & Urban Development, Dept. of (HUD)	1
National Highway Traffic Safety Administration (NHTSA)	7
Transportation, Dept. of (DOT)	2
Total	30

#### Proposed Foreign Regulations

The GATT Secretariat in 1990 issued 332 notifications from countries other than the United States. (See table III.) The foreign regulations covered a wide variety of products, including bed warmers, fish farming, dentifrice, cooked ham, and mud additives. SCI maintains a Key-Word-Out-of-Context (KWOC) index for all products that are the subject of foreign notifications. (See Appendix A for the 1990 index.) (KWOC is an indexing method in which keywords, in this instance product names, appear as headings on a separate line.) The KWOC index is used to identify regulations that may be of interest to individuals who have expressed interest in specific products.

SCI regularly sends foreign notifications to members of the Industry Functional Advisory Committee on Standards (IFAC)<sup>2</sup> and several other groups and specific individuals to serve their information needs and to allow them to disseminate this information to others. SCI sends copies of all foreign notifications to the American National Standards Institute for subsequent publication in its biweekly ANSI Reporter.

---

<sup>2</sup> The IFAC is comprised of Government-appointed individuals from private industry engaged in standards-related activities. It advises the Department of Commerce and USTR on trade matters, the operation of any adopted trade agreements and other subjects related to U.S. trade policy.

### Inquiries

SCI responded to 407 domestic and foreign letter and telephone requests for GATT notification information (308 U.S., 99 foreign) in 1990. Many requestors asked for copies of more than one regulation. In addition to requests for specific regulations, many individuals asked for general information on the Standards Code. SCI responds to such requests by sending an information package consisting of the latest issue of its newsletter, tbt news, a list of recent foreign notifications, brochures describing the Standards Code, and ordering information for the Commerce Business Daily.

In 1990, the most often requested regulations concerned telecommunications equipment, chemicals, ozone layer depleting substances (CFCs), metric use, medical products and electrical equipment. In addition, 392 individuals called the GATT hotline for up-to-date information on foreign notifications.

### Translations

SCI requests the text of all proposed foreign regulations which are notified. Signatory countries are required to supply copies of the regulations through their inquiry points. Of the 319 regulations received in 1990, 189 were in languages other than English. SCI coordinates a service to obtain an English translation on request, of any proposed regulation in a foreign language. The cost of translation is paid by the requestor; if more than one request is received for the same translation, the cost is divided equally among requestors. In 1990, SCI received five requests for translation of five regulations and standards-related documents.

## STANDARDS INFORMATION

The National Center for Standards and Certification Information (NCSCI) is the national focal point for standards-related information. NCSCI supports GATT inquiry point activities by supplying information concerning both domestic and foreign standards. The information center, established in 1965, provides government, industry and the public with information on standards, regulations, certification programs, and related activities that affect trade and commerce.

NCSCI maintains a microform and/or hard copy collection of engineering standards and specifications, test methods, regulations, certification rules, directories, reference books and special publications. In 1990, NCSCI staff responded to more than 5,000 requests from all over the world on the existence, source, and availability of standards and related documents. Thirty-two of the 40 signatories contacted the Center for information. (See Appendix B.) NCSCI also responds to

trade-related queries regarding regulations or other requirements imposed by foreign countries that affect the export of U.S. manufactured products.

In 1990, SCI published and NCSCI distributed the Directory of European Regional Standards-Related Organizations (NIST SP 795) which lists European organizations involved in standards-related activities.

In a related area - the EC 1992 Single Internal Market - NCSCI established an EC hotline to report on draft CEN and CENELEC standards and EC directives related to standards which may affect trade. The recorded hotline - (301) 921-4164 (not toll-free) - is updated weekly and provides the subject/product areas, document number and final date for comments. The hotline was established in August 1990 and over 800 calls have been received as of December 31, 1990.

NCSCI staff also review the Official Journal of the European Communities to identify proposed standards-related directives. Copies of the directives are sent to the appropriate trade or professional associations for dissemination to and review by their members.

#### TECHNICAL OFFICE

The Technical Office, established by the Trade Agreements Act of 1979, is responsible for providing technical support related to non-agricultural products. Office functions include:  
a) participation in standards-related conferences; b) technical assistance to the International Trade Administration of the Department of Commerce and the Office of the U.S. Trade Representative in developing proposals to enhance the Standards Code; c) preparation of special reports on standards issues; and d) coordination of comments on proposed foreign regulations.

1990 Technical Office activities included:

- o Technical office staff assisted the American Institute of Aeronautics and Astronautics in reviewing draft standards developed within their recently established standards program.
- o Office staff participated in continuing bilateral discussions with Mexico standards officials to establish a Free Trade Agreement.
- o Staff members continued their work with other Government agencies to inform U.S. industry of EC 1992 standards-related activities. These activities included participating in the EC 1992 Work Group on Standards, Testing and Certification and making presentations on EC 1992 standards development activities to interested U.S. industry groups.

### Comment Handling

A major objective of the Standards Code is to allow exporters, government agencies, and other interested parties to comment on proposed foreign regulations which they believe would unjustifiably impede exports. SCI provides the text of proposed foreign regulations on request and encourages the submission of comments if a regulation appears to create unnecessary trade barriers. SCI transmits comments to the appropriate foreign government and coordinates any follow-up activity. In 1990, SCI received and processed formal comments on four foreign regulations: Sweden - cosmetics (90.72) and emission parts for light vehicles (90.237); EEC - pneumatic tires (90.237); and Japan - cosmetics (90.291).

Additional informal comments are frequently made by industry representatives who become aware of proposed regulations, often even before they are officially notified through the GATT. The notification system can often serve as a back-up mechanism to ensure awareness of foreign developments.

Sweden submitted comments on a proposed Food and Drug Administration proposal. The comments were forwarded to the appropriate FDA office for action.

### Comment Periods

So that signatories will have adequate time to receive the text of a regulation (and to have it translated if necessary), review it, and prepare comments, the Standards Code recommends a comment period of at least 60 days. If the comment period is insufficient (e.g., due to late receipt of an English version or complicated technical issues), the SCI staff will request that the issuing country extend the comment period. In 1990, eight such requests were made by the United States to the notifying Parties. Four of the extension requests were granted. Many extensions are requested so that individuals can translate and study the regulation without necessarily indicating an intention to comment. SCI staff also received five requests from other signatories requesting extensions of the comment period for proposed U.S. technical regulations.

The average length of the comment period<sup>3</sup> in 1990 was 49 days for U.S. regulations and 44 days for foreign regulations. The average length of the comment period, by U.S. agency, is shown on the following page.

---

<sup>3</sup> Number of calendar days between the date the notification was issued by the GATT Secretariat and the closing date for comments.

CPSC	42 days
DOE	62 days
DOT	70 days
EPA	64 days
FCC	36 days
FDA	62 days
HUD	52 days
NHTSA	32 days
USDA	34 days

Comment periods for foreign regulations ranged from none at all to 407 days. The average length of comment period by country was:

Austria	72 days	India	0 days
Belgium	0 days	Japan	56 days
Brazil	0 days	Korea	19 days
Canada	25 days	Netherlands	46 days
Czechoslovakia	39 days	New Zealand	36 days
Denmark	30 days	Norway	70 days
EEC	39 days	Philippines	1 days
Finland	73 days	Singapore	0 days
France	0 days	Sweden	60 days
Germany	0 days	Switzerland	71 days
Hong Kong	43 days	United Kingdom	17 days
Hungary	0 days	Yugoslavia	48 days

#### CONCLUSION

SCI continues to work with U.S. industry to address standards-related trade problems and to assure wide distribution of relevant notifications of proposed foreign regulations which might affect trade. Requests for further information, suggestions on how the service might be made more useful, or comments on subjects covered in this report should be directed to:

Standards Code and Information Program  
 National Institute of Standards and Technology  
 Administration Building, Room A629  
 Gaithersburg, MD 20899  
 (301) 975-4037

For specific standards-related information from NCSCI, call (301) 975-4038, -4040, or -4036.

For up-to-date information on foreign proposed regulations, call the GATT Hotline (301) 975-4041.

## STANDARDS CODE SIGNATORIES

Argentina (a)	Japan
Austria	Korea
Belgium	Luxembourg (b)
Brazil	Mexico (b)
Canada	Netherlands
Chile (b)	New Zealand
Czechoslovakia	Norway
Denmark	Pakistan (b)
Egypt (b)	Philippines
European Economic Community (EEC)	Portugal (b)
Finland	Romania
France	Rwanda (a) (c)
Federal Republic of Germany	Singapore
Greece (b)	Spain
Hong Kong	Sweden
Hungary	Switzerland
India	Tunisia
Ireland	United Kingdom
Israel (b)	United States
Italy	Yugoslavia

(a) - the country has not yet ratified the Standards Code and has not reported any proposed regulations to the GATT Secretariat.

(b) - the country has not reported any proposed regulations to the GATT Secretariat.

(c) - the country has not established an inquiry point for standards information and has not reported any proposed regulations to the GATT Secretariat.

1. PUBLICATION OR REPORT NUMBER NISTIR 4559
2. PERFORMING ORGANIZATION REPORT NUMBER
3. PUBLICATION DATE April 1991

## 4. TITLE AND SUBTITLE

GATT STANDARDS CODE ACTIVITIES OF THE NATIONAL INSTITUTE OF STANDARDS  
AND TECHNOLOGY 1990

## 5. AUTHOR(S)

JoAnne R. Overman

## 6. PERFORMING ORGANIZATION (IF JOINT OR OTHER THAN NIST, SEE INSTRUCTIONS)

U.S. DEPARTMENT OF COMMERCE  
NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY  
GAIITHERSBURG, MD 20899

## 7. CONTRACT/GANT NUMBER

8. TYPE OF REPORT AND PERIOD COVERED  
Annual - 1990

## 9. SPONSORING ORGANIZATION NAME AND COMPLETE ADDRESS (STREET, CITY, STATE, ZIP)

## 10. SUPPLEMENTARY NOTES

DOCUMENT DESCRIBES A COMPUTER PROGRAM; SF-185, FIPS SOFTWARE SUMMARY, IS ATTACHED.

## 11. ABSTRACT (A 200-WORD OR LESS FACTUAL SUMMARY OF MOST SIGNIFICANT INFORMATION. IF DOCUMENT INCLUDES A SIGNIFICANT BIBLIOGRAPHY OR LITERATURE SURVEY, MENTION IT HERE.)

This report describes the GATT Standards Code activities conducted by the Standards Code and Information Program, National Institute of Standards and Technology (NIST), for calendar year 1990. NIST responsibilities include operating the U.S. GATT inquiry point for information on standards and certification activities and the technical office for non-agricultural products; notifying the GATT Secretariat of proposed U.S. Federal Government standards-based rules that might significantly affect trade; assisting U.S. industry with standards-related trade problems; and responding to inquiries about proposed foreign and U.S. regulations.

## 12. KEY WORDS (6 TO 12 ENTRIES; ALPHABETICAL ORDER; CAPITALIZE ONLY PROPER NAMES; AND SEPARATE KEY WORDS BY SEMICOLONS)

certification information; GATT Standards Code; notifications; proposed foreign regulations; standards information; technical assistance
